of work. Arrangements are almost completed for starting the public works authorized last August for the relief of the situation, but at the moment the apportioning of funds and the increase of the amount of work to be undertaken is occupying the Chamber of Deputies. The public works appropriation is the Parliamentary pork barrel of the country.

Signor Ricelo, Minister of Public Works is attempting to hold the balance between the Deputies competing for apportionments and to protect the national budget from being swamped with more recipiets than it can stand. He stated in the Chamber the other day that in the first three months of this year there has already been paid out for labor on public works 1,300,000,000 live, as against 25x,000,000 in the whole year of 1914. He added that although the Minister of Finance had authorized the expenditure of 3,000,000,000 more for public labor this year, he did not see where the money was coming from.

Plans of Reclamation.

Plans of Reclamation.

The Government's policy of public works is a sound one in that the money spent constitutes an investment which in future years will more than pay for itself. Instead of providing "busy work" the Ministry is carrying out a far sighted scheme for the transformation of malarial marsh lands into fertile territory. Since 1850 the Government has obtained more than 329,000,000 lire in plus value from its reclaimed lands. For this work the Government spent 57,783,310 lire for reclaiming 394,027 acres, and private consortiums spent an equal amount, but recovered 394,027 acres. This year the Government has appropriated 80,000,000 lire for reclaimation of land in eight provinces and work began in March.

Other projects of the Government are equally constructive. Roads and railways are being built in Sicily and Calabria, and in the latter province the Government is building artificial lakes to store water for the hydroelectric plants in the Sila plateau. This part of the country being dry, irrigation and not draining is the problem, and the Government has offered to help local irrigation consortiums by paying one-third of the cost of irrigation projects of benefit to the whole country.

One of the largest of these irrigation projects is now being planned in the Paduan Valley of north Itsey, where Paduan Valley of the Paduan Valley of the Paduan Valley of north Itsey, where Paduan Valley of the Paduan Va March.

SOVIET HARNESSING FITZGERALDS LOSE CHURCH TO STATE

Remaking Orthodox Clergy Present Duke Sold Reversion-With Design of Fashioning Political Organ.

Attempts by the Fitzgeralds of Ireland to regain their historic family seahave brought to light a strange drama of inheritance, in which the principals are the seventh Duke of Leinster, and Sir Harry Mallaby-Deeley, M. P., millionaire cotton mill owner, made a baronet in a recent honor ist.

For a comparatively small sum Sir s political organ to support and spread Communist doctrines among the people.

The execution of five priests, who resisted the Government's requisition of church valuables, has terrorized and weakened the clergy. Those who still resist are lodged in Soviet jails; but the remainder are docile, by force of circumstance.

Peter the Great had conflicts with the church before, and finally harnessed church to State. The Soviet Government first tried to break the Orthodox church, then to ignore its existence, and now attempts to utilize its enormous power over the masses. The Bolsheviki no longer fear the opposition of the peasantry.

The Soviet method is to play off the black or lower clergy against the white and more prosperous upper churchmen. The Bolsheviki pictured the imaginary riotous living in the upper branch, and at the same time gave inducements to the leaser priests. Formerly these village priests lived in penury, entirely on Communist doctrines among the people.

The grave depression in the metallurical districts of Milan and Turin is a reatening to throw more men on the treets, and as usual the condition of memployment in the province of Emilia widespread.

The situation in Emilia is typical of the sort of problem Italian State officials ave to face. For the last twenty years the province has been greatly overpoputed, but the surplus citizens have resused to emigrate. There is therefore a used to emigrate. There is therefore a hronic floating population of day laborate who practically are a charge on the state.

These laborers were excellently organized by the Socialists and were therefore able to exert a powerful pressure on the Government to provide public works every years and to provide for organized of employment, so that every-and seizures are likely to continue for
